-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Priority***

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### ***Drawings***

2. The drawings were received on 3/22/2004. These drawings are accepted by the examiner.

### ***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 11-30 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yamaoka 4408887.

The Yamaoka '877 reference discloses a screw sleeve 16 with flow channels 39, 39, 39, figure 4 with 1<sup>st</sup> ribs 29 with a ridge face, and a screw extruder section with 2<sup>nd</sup> ribs 32, 32, figure 3, and flow channels between the 2<sup>nd</sup> ribs and having a ridge face.

The Yamaoka '877 reference discloses all of the recited subject matter as defined within the scope of the claims with the exception of having the geometry of the ridge faces of the sleeve corresponding to at least 1/3<sup>rd</sup> of the flow channel, and the gap

formed corresponding to 0.5% of the diameter of the screw (claim 1); or at least 1mm as the gap (claim 26).

Absent unexpected result to the geometry gap, and ridge sizes of the Yamaoka '877 device, and since such a modification would have involved a mere change in the size of a component. ( A change in size is generally recognized as being within the level of ordinary skill in the art. In re Rose, 105 USPQ 237 (CCPA 1955).), it is deemed that it would have been obvious to one of ordinary skill in the art to modify the sized of the ridge face, width of the gap to a more appropriate size in order to optimize the shear effects produced between the flow of material between the two surfaces of the gap, or the ridge face and that of the channels.

### ***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Geyer 5348388 and 5641227, Csongor 4749279, and 4447156, Yamaoka 5370456, and Wenger 5694833.
